EXPERIENCE

Senior Software Engineer

Ascendion Inc.

Apr 2022 – Present | Remote

• Gcash Philippines

- Built scalable, enterprise-grade Java microservice applications and greenfield products for GCash, including GInsure, GLoan, Promo, GForest, Send Money Protect, and GImpact.
- Designed and implemented automated synchronization, auto-scaling, and CI/CD-driven pod deployments on AWS EKS, resulting in multimillion-dollar cost savings
- Led a 5-member team to resolve security issues and drive test coverage to 95% across multiple repositories
- Conducted performance testing and contributed to GCash performance optimization

Associate L3

Apex Fund Services

Jul 2021– Apr 2022 | Remote

• Hedge Fund Management Application

- Built a Java application to track fund data changes with a real-time dashboard
- Developed Python-driven Tableau extracts to enable automated, scheduled dashboard refreshes.

Software Engineer

JMR Infotech

Jul 2019– Jul 2021 | Bangalore

- Built a Java-based reporting tool for Bank South Pacific to generate multiple reports using MySQL queries.
- Built PDF and image compression web applications using Python, MySQL, and Angular 8, achieving up to 95% compression.

Software Engineer

Zwayam

Oct 2017– Jul 2019 | Bangalore

- Created Resume Parser to retrieve important candidate details.
- Built Applicant Tracking System to keep a track on every status of candidate starting from applies to joined state.
- Built tools to create powerful reports required for candidate and Job Analysis using Elasticsearch 5.6.
- Led infrastructure management of AWS across production and non-production environments.
- Created multiple Python and Robot Framework scripts to automate repetitive operational tasks.
